

Clark Walker
Full Stack Developer
303-588-8753 - 303walker@gmail.com

I've been a Firefox user since 2006 and I still think it's the greatest browser in existence. I think that it's among the few ubiquitous technologies that provides a genuine service to its users and provides a secure and pleasant browsing experience. I am excited to see that Mozilla listed openings for Associate Full Stack Developer roles as this is the position that I'm seeking and an opportunity that I'd be eager to take part in.

Recently I've been learning Web Assembly and using it as a medium to practice C, C++ and Rust. I'm also learning ElectronJS and I have ambitions of building performant cross platform applications using WASM, Rust and deploying to Electron / Node. I'm also brushing up on data structures and algorithms as well as studying statistics and linear algebra in addition to pursuing an education in machine learning engineering.

I have been programming since 2013, In 2018 I completed a full time 6 month Full Stack Developer Immersive at Galvanize INC where I was then subsequently employed as an Associate Data Science Prep Instructor. My responsibilities included proctoring technical interviews, teaching and co-developing Python curriculum with my team for our Data Science Prep course as well as 1 on 1 mentoring meetings with our Data Science Immersive prospective students. While I was there I was exposed to and adapted to new technologies and techniques quickly. I've developed expertise in Python and JavaScript and I am excited to learn new technologies and languages.

Skills:

- JavaScript, Node, Electron, npm, nvm, npx, WASM
- Python, pandas, numpy
- MVC frameworks, Flask, React
- Rust, C, C++
- html, CSS/SASS, SQL
- Linux, bash scripting, git
- OOP, Functional

I am curious, self-motivated, and I thrive in remote, asynchronous, collaborative working environments. I also value feedback, collaboration, and empathetic communication and seek to cultivate such in team dynamics.

Thank you for considering my application. I just wanted to notify you that I'm also applying to several other locations listed on your LinkedIn for the same position.

-CW
